Technical Specialist – for you who want to design and implement data structure

Are you motivated by being involved from the start of the task of designing and digitizing the entire product labelling system for delicious finished ready meals for customers all over the world? Then join the IT team at Vega Salmon, where you will have a great influence on structure, design and implementation.

Vega Salmon is Europe's largest salmon processing company, delivering delicious meals to consumers and partners all over the world. The task is to structure, design and implement a new product labeling system. The data structure is developed based on the needs of the organization in collaboration with existing project team. A success criterion in this newly created position is to reduce the number of errors on packaging through the systematization of data and automation of processor and control. Your colleague ensures that the text follows a number of food regulations that are a prerequisite for sales to the individual countries. Therefore, a high sense of urgency is necessary in the role of Technical Specialist, Labelling Function. After commissioning, you will continue to be responsible for the technical maintenance and further development, but there are also many exciting new digitization tasks ahead. You will also collaborate with colleagues at the factory in Handewitt, on the Northern German border. Vega Salmon has a value-based management style, happy colleagues and you get a positive open and honest superior who is available.

The position refers to Senior Manager, IT & Projects.

Responsibilities:

- Participate in the analysis and mapping of the organization's needs.
- Design data structure and data flow.
- Implement data structure, print automations, controls, etc.
- Cooperate with the Quality Specialist – Labelling Function that the fixation is easy to use for users as well as ensuring consistency between content and data attributes.
- Responsible for our maintenance and development in software.
- Ensure software and hardware operation security.
- Join labelling function, as a matrix organization.

Deliveries:

- Contribute to the transition from semi-automatic/manual process to fully digitized process.
- Ensure uptime and a well-functioning system.

VEGA Salmon

Employment Type

Full-time

6000, Kolding

Indrykket

July 4, 2022

Søg nu

- Ensure good implementation through user and supplier involvement in the process.

Location and travel days

- Flexible residence within driving distance of the office in Kolding.
- Flexible meeting times, but available.
- Frequent visits to the factory in Handewitt on the North German border.

Culture

The IT department is characterized by a modern and direct management style, where improvements are found in dialogue. Here you talk to your colleague in an informal, proper and typically humorous tone. Cooperation is based on openness and trust. There is a strong investment in IT and automations, which is why a Master Data Specialist has just joined, just as the newly created position Quality Assurance, Labelling function is in process.

Your background:

There are several ways into the job – perhaps you are experienced and have through projects as well as practical tasks with software development and maintenance learned skills that can match the task. Perhaps the recent graduate has the latest relevant knowledge that can be used to solve the task. Practice desired competencies are:

- Programming in software. Eg. Dynamics NAV, SQL, C Sharp, Power Apps, PHP/HTML, VB Script. Vi anvender Nicelabel.
- ERP understanding. We use Business Central.
- Uformation as Software Engineer, Software Developer or similar. alternatively, practical experience with the same task type with acquired software skills.
- You speak and write Danish & English. English is the corporate language.

You as person:

Your work style is structured with a good eye for detail. You are good at collaborating, take responsibility and are a self-starter who finishes the tasks. You know or understand the importance of integration to ERP system.

You are attracted to be able to contribute and see the benefit of your efforts in this specific project and future digitization tasks. Your efforts and knowledge will contribute to the continued growth. You have the curiosity and willingness to continuously learn new things.

It should be fun to go to work, so you contribute humor, and are ready for change as well as persistent in your approach. You are rational and fact-based in your behavior with hands-on approach.

Application:

Feel free to contact FoodCareer.dk Christian Saabye Simonsen mobile 0045 5130 6866 for questions and email your motivated application and CV using this link. All applicants are treated with discretion. Interviews are called on an ongoing basis for employment as soon as possible.
